RE: 2024 RSG Work Program

General Chairpersons:

This is a notice in accordance with the 1991 National Agreement, the 1996 National Agreement, and our various agreements relating to Regional and System-wide Gangs, that on or after January 1, 2024, the BNSF Railway Company intends to establish regional or system-wide gangs, as shown on the attached gang charts, for the purpose of working over specified territory in the case of regional gangs, or throughout the territory in the case of system-wide gangs.

The Gangs shown in the attachment to this notice will perform work during the 2024 work season in more than one seniority district. (To avoid any misunderstanding about the extent of the 2024 work program, it should be noted that additional notices supplementary to this notice may be served covering additional regional or system-wide gangs.)

Attached to this letter for your information are tables prepared for each of the gangs indicating, among other information, the work program as now planned, the location of the projects to be handled, time schedule, approximate manpower staffing requirements, and seniority districts involved. In light of the fact that these plans for regional and system-wide gangs for the 2024 work season cover work that will actually be performed from six months to more than a year in the future, the attached detailed plans may be affected by changes in levels of business, changes in train schedules to meet customer needs, weather conditions, equipment failure, or other production problems, emergencies, acts of God, as well as other unexpected factors.

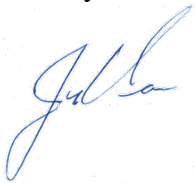

Therefore, prior to the actual start of the work season and throughout the work season, the anticipated time schedules of the work may need to be shortened or lengthened, certain planned work locations may have to be deleted and others substituted or added, the amount of work planned at certain locations may be changed, and the indicated sequence of the work may be altered. It should be noted that the projected manpower requirements indicated on the attached charts are for a typical type of the gang

involved, but that such requirements may vary depending upon the nature of the individual work projects, the types of equipment available for the gang, and other factors not predictable at this time.

BNSF proposes to apply the currently effective BNSF Terms and Conditions for Regional and System-wide Gangs to these gangs. As per information on the attached documents, consolidated seniority district numbers do not show the two zeroes that follow each consolidated district number due to a restriction in BNSF's schedule program (e.g., 1 = 100, 2 = 200, 3= 300, etc.).

As previously arranged, the parties will meet beginning at 10:00 a.m. on Thursday, November 2, 2023, to discuss RSG schedules. If you have any questions, please contact James Rhodes at (817)-253-4869.

Sincerely,

Joe R. Heenan
General Director Labor Relations
